

National Annex: US Department of Agriculture – National Institute of Food and Agriculture (NIFA)

Partners: US Department of Agriculture National Institute of Food and Agriculture (NIFA), in partnership with the US National Science Foundation (NSF)

Eligibility and national funding modalities:

NIFA intends to support the Belmont Forum’s Collaboration Research Action (CRA) on Climate, Environment and Health by providing information on NIFA-funded U.S. researchers and projects to enable collaborative opportunities with international partners in the CRA to address topics of mutual interest. This information can be found at:

<https://nifa.usda.gov/resource/nifa-supported-activities-related-climate-and-one-health>

This information was obtained from a NIFA public database (<https://reeis.usda.gov/>) and includes projects that have been funded over the last five years.

The National Institute of Food and Agriculture (NIFA) provides U.S. institutions extramural funding to advance agricultural research, education, and extension to solve societal challenges (<https://nifa.usda.gov/who-we-are>). Research includes examining the impact of climate change on the agricultural sector, providing the information that underlies ways to mitigate and adapt to a changing climate, and the impacts of climate change on human, animal, and environmental health that are associated with the agricultural sector.
